Summary

Creative technologist working at the intersection of interactive media and AI. From founding an indie game studio and shipping commercial titles with partners like Google and Devsisters, to designing RAG pipelines and tool-using agents, I connect emotion, creativity, and intelligent systems.

An independent problem-solver who decomposes ambiguous goals into testable pieces, ships a working prototype before asking for help, and automates repeat work (CI/CD, agent pipelines). Toolkit spans Unity/C# for games, Python/FastAPI/LangChain for AI, and Vue/TypeScript for web.

Experience

buho Interactive Entertainment Co., Ltd., Game Designer / Unity Developer

Taiwan

- Lead game planning, Unity development, and project management for multiple commercial titles including Braverse (CookieRun IP, with Devsisters) and Wacky Boat.
- Built core gameplay systems and production infrastructure that keep teams shipping fast.
- Designed CI/CD pipelines (Fastlane + Discord bot control) that reduced release prep time by ~70% and enabled remote-triggered builds and TestFlight uploads.

Mar 2024 – present
2 years 4 months

Independent Studio, Founder / Game Director / Developer

Taiwan

- Independently developed and commercially released *Soul of Butterflies – Incubation*, a narrative puzzle adventure.
- Ran the full cycle solo — story design, puzzle systems, crowdfunding, event exhibitions, and Steam release.

Sept 2022 – Mar 2024
1 year 7 months

NPC – NTUT Programming Club, Chief of Operations

Taipei, Taiwan

- Organized and hosted technical events, including a Machine Learning course in partnership with Google.
- Managed cross-disciplinary collaboration among student members.

2019 – 2022

Projects

A Slime — Local AI Agent

2026

- Local AI assistant with RAG (Chroma + LangChain), tool use, and a Vue 3 chat UI backed by FastAPI; supports Google Gemini, Ollama, and NVIDIA NIM.
- Document ingestion pipeline, WebSocket chat, calendar/search tools, and multi-provider LLM routing in a self-hosted stack, with an optional Tauri desktop shell.
- Tech: Python, FastAPI, LangChain, Vue.js, TypeScript, Tauri

Braverse (CookieRun IP)

2024 – present

- Web-based interactive tutorial teaching players the Braverse Trading Card Game, based on the CookieRun IP (with Devsisters).
- Building tutorial systems and ensuring gameplay clarity for new players.
- Tech: Unity, C#, Game Design

Wacky Boat — Game Backend

2024 – present

- Go backend powering Wacky Boat — player accounts with OAuth sign-in, leaderboards, and progress sync; the game-services API the Unity client depends on.
- Containerized with Docker and deployed on Google Cloud Platform (Cloud Run / GKE) with Firestore / Cloud SQL persistence.
- Tech: Go, GCP, Cloud Run, OAuth, Firestore, Docker

Soul of Butterflies – Incubation	2024
• Narrative puzzle adventure — independently developed, crowdfunded, exhibited at gaming events, and commercially released on Steam. • Steam Page • Tech: Unity, C#, Steam, Game Design	
Tarowl: Pocket Tarot	2024
• AI-powered tarot reading app with a Flutter frontend and TypeScript backend on Google Cloud Platform; released and iterated via user feedback. • Tech: Flutter, TypeScript, GCP, Firebase	
Unity CI/CD Automation Pipeline	2025
• CI/CD automation for Unity builds using Fastlane, with a Discord bot for remote build control and TestFlight uploads. • Reduced release prep time by ~70% and increased iteration efficiency for QA and design teams. • Tech: Unity, Fastlane, GitHub Actions, Discord, iOS	

Education

BS	National Taipei University of Technology , Computer Science	Taipei, Taiwan 2018 – 2022
