Summary

AI / backend engineer building LLM-powered systems — RAG pipelines, vector databases, tool-using agents, and multi-provider inference routing — served through Python/FastAPI backends and deployed with Docker on GCP.

Experience

- | | |
|--|--|
| Independent / Personal Projects , AI Engineer (Builder) | Taiwan |
| <ul style="list-style-type: none"> Built A Slime, a self-hosted AI agent with RAG (Chroma + LangChain), tool use, and multi-provider LLM routing (Gemini, Ollama, NVIDIA NIM) behind a FastAPI backend. Shipped Tarowl, an AI-powered app on GCP (Flutter + TypeScript), iterating on model behavior from live user feedback. | 2024 – present
2 years |
| buho Interactive Entertainment Co., Ltd. , Backend Engineer / Software Developer | Taiwan |
| <ul style="list-style-type: none"> Built Go backend services and CI/CD infrastructure on GCP (Cloud Run / GKE, Docker) — the deployment foundation for serving models and APIs in production. | Mar 2024 – present
2 years 4 months |
| NPC – NTUT Programming Club , Chief of Operations | Taipei, Taiwan |
| <ul style="list-style-type: none"> Organized a Machine Learning course delivered in partnership with Google. | 2019 – 2022
3 years |

Projects

- | | |
|---|------|
| A Slime — Tool-Using AI Agent | 2026 |
| <ul style="list-style-type: none"> Document ingestion pipeline + RAG over a Chroma vector database (LangChain), exposed via a FastAPI + WebSocket backend. Agent tools (calendar, search) and multi-provider LLM inference routing abstracted behind one interface; Vue 3 client + Tauri desktop. Tech: Python, FastAPI, LangChain, Chroma, LLM APIs, WebSocket | |
| Tarowl: Pocket Tarot (AI App) | 2024 |
| <ul style="list-style-type: none"> AI-powered tarot reading app — Flutter client, TypeScript backend, GCP services; released and iterated via user feedback. Tech: Flutter, TypeScript, GCP, Firebase | |

Education

- | | |
|--|----------------|
| BS National Taipei University of Technology , Computer Science | Taipei, Taiwan |
| | 2018 – 2022 |

Skills

AI / ML: LLM inference APIs, RAG, vector databases (Chroma), LangChain, NLP pipelines, agents/tool use, prompt engineering

Backend: Python (FastAPI), Go, Node.js, RESTful APIs, OAuth2/JWT, WebSocket

Data / DevOps: PostgreSQL, MongoDB, Firestore, Docker, CI/CD, GCP, Cloud Run, GKE

Languages: Mandarin (Native), English (Professional), Japanese (Learning)
