Summary

Backend engineer building scalable services and APIs in Python (FastAPI) and Go. I design RESTful systems, integrate LLM/RAG pipelines and vector databases into production backends, and automate delivery with Docker, Git, and CI/CD on GCP.

Experience

- buho Interactive Entertainment Co., Ltd.**, Backend Engineer / Software Developer Taiwan
 • Built a **Go** backend — player accounts with **OAuth** sign-in, leaderboards, and progress sync — exposing **REST APIs** to client apps. Mar 2024 – present
 • Persisted data in **Firestore / Cloud SQL**, containerized with **Docker**, and deployed to **GCP (Cloud Run / GKE)**. 2 years 4 months
 • Designed **CI/CD pipelines** (Fastlane + Git) that cut release-prep time by ~70%; participated in code reviews.
- Independent Studio**, Founder / Full-Stack Developer Taiwan
 • Owned products end-to-end — backend services, APIs, data, and client integration — building, releasing, and maintaining commercial software. Sept 2022 – Mar 2024
1 year 7 months

Projects

- A Slime — Self-Hosted AI Agent (RAG + LLM APIs)** 2026
 • **FastAPI** backend serving a tool-using agent: document ingestion, **RAG** over a **Chroma vector DB** (LangChain), and **WebSocket** chat.
 • Multi-provider **LLM inference routing** (Gemini, Ollama, NVIDIA NIM) behind a single backend interface.
 • Tech: Python, FastAPI, LangChain, Chroma, WebSocket
- Game Services Backend (Go on GCP)** 2024 – present
 • **Go** REST API for accounts, leaderboards, and game data with **OAuth Docker**-containerized, deployed to **Cloud Run / GKE, Firestore / Cloud SQL** persistence.
 • Tech: Go, GCP, Cloud Run, OAuth, Firestore, Docker
- CI/CD Automation Pipeline** 2025
 • Build/test/deploy automation with **Fastlane, GitHub Actions**, and a custom Discord bot for remote control; ~70% faster release prep.
 • Tech: Fastlane, GitHub Actions, Git, Docker

Education

- BS** **National Taipei University of Technology**, Computer Science Taipei, Taiwan
2018 – 2022

Skills

Backend: Python (FastAPI), Go, Node.js, RESTful API design, OAuth2/JWT, WebSocket, microservices, event-driven systems
Databases: PostgreSQL, MySQL, MongoDB, Firestore, Cloud SQL, query optimization, caching
DevOps / Cloud: Docker, CI/CD, Git, GitHub Actions, GCP, Cloud Run, GKE (Kubernetes)
AI Integration: LLM inference APIs, RAG, vector databases (Chroma), LangChain
Languages: Mandarin (Native), English (Professional), Japanese (Learning)
