Summary

Gameplay software engineer with 4+ years in game development. Strong in C# / Unity (with C++), leading gameplay systems from requirements analysis through technical design and implementation, and delivering tools that raise team efficiency. Shipped a commercial title; I value robust, scalable, performant solutions and pragmatic, player-empathetic technical decisions.

Experience

buho Interactive Entertainment Co., Ltd., Gameplay Engineer / Unity Developer

Taiwan

- Lead gameplay features for **Braverse** (CookieRun IP, with **Devsisters**) and **Wacky Boat** — gathering requirements with design, then owning requirements analysis, technical design, and final implementation.
- Partner with design and art leads to identify development bottlenecks and ship tools — a **Fastlane** + Discord-bot **CI/CD** pipeline that cut release-prep time by ~70%.
- Iterate and optimize within an **Agile** process for robustness, scalability, and performance; help establish dev standards and technical direction.

Mar 2024 – present
2 years 4 months

Independent Studio, Founder / Game Developer

Taiwan

- Independently built and commercially shipped the narrative puzzle game **Soul of Butterflies – Incubation** — owning gameplay systems, puzzle and level design, and engineering.
- Ran full **prototyping and pre-production**, then delivered end-to-end from crowdfunding and expos to a **Steam** release.

Sept 2022 – Mar 2024
1 year 7 months

NPC – NTUT Programming Club, Chief of Operations

Taipei, Taiwan

- Organized technical events, including a Machine Learning course with **Google** coordinated cross-disciplinary student teams.

2019 – 2022
3 years

Projects

Soul of Butterflies – Incubation (Shipped)

2024

- Self-developed narrative puzzle game — crowdfunded, exhibited at expos, and commercially released on Steam to positive player feedback.
- Owned gameplay, puzzle systems, and level design; engine Unity / C#.
- [Steam Page](#)

Braverse (CookieRun IP)

2024 – present

- Web-based interactive tutorial teaching the Braverse trading card game (CookieRun IP); built tutorial systems to ensure gameplay clarity for new players.
- Tech: Unity, C#, Game Design

Unity CI/CD Toolchain

2025

- Team-efficiency tooling — **Fastlane** + **GitHub Actions** + a Discord bot for remote builds and TestFlight uploads.
- Cut release-prep time by ~70%, speeding QA and design iteration.

Education

BS **National Taipei University of Technology**, Computer Science

Taipei, Taiwan
2018 – 2022

Skills

Languages: C#, C++, Python

Game Dev: Unity, gameplay systems, game/software design patterns, level & puzzle design, performance optimization, debugging, Steam release

Tools & Process: CI/CD (Fastlane), GitHub Actions, Git, Docker, tool development, Agile, prototyping/pre-production

Spoken: Mandarin (Native), English (Professional), Japanese (Learning)
